

At my school, Radcliff Elementary, in Pajaro Valley Unified School District, we use digital learning to meet Common Core State Standards, take AR Quizzes, administer online assessments like Manga High, and make data-driven decisions. It is always a challenge when the network is down from simple things like taking attendance, to having students take an assessment in the computer lab. The need for a reliable high-speed network is only going to increase in the near future as more and more of our teachers and students use the technology.
